

**GulfMedical** was founded in 1983 to bring innovative state-of-the-art medical technologies to Saudi Arabia and the Gulf. The company also plays an active part in developing the skills of leading medical practitioners, particularly in the field of: Cardiovascular, Critical care, Anaesthesiology, Haemodialysis, Neuro & Spinal Surgery, Endoscopy and Robotic Surgery.

This commitment to technology transfer is radically different to the majority of medical suppliers in the Middle East, and has led to many awards and recognitions, including an award for International Technical Service Center of the Year, presented at the American Society of Anesthesiologists Conference in USA.

The company's dedicated team of professionals is a highly educated multilingual workforce consisting of Biomedical engineers and health care specialists.

Though Saudi Arabia represents more than 50% of the Gulf Market for these medical innovations, **GulfMedical** has a region-wide portfolio so it has already opened offices in Bahrain, Qatar and the United Arab Emirates and plans to open in Oman and Kuwait. The company therefore has the technical expertise and geographical reach to sell and install medical equipment and supplies to private and public hospitals and medical centers throughout the Gulf.

Working in close cooperation with its suppliers and hospitals, **GulfMedical** has established an enviable track record and reputation for bridging cultural barriers and bringing breakthrough medical technologies to the Gulf. These help medical institutions provide the very best health care facilities for their patients.

**GulfMedical** has a remarkable history of introducing state of the art medical technology in the gulf region and provided equipment and support for the followings:

- First Transcatheter implant in the Middle East (Melody Valve)
- The first Cardiovascular Minimally Invasive Surgery in the Gulf Region.
- The first Cardiomyoplasty procedure in the Gulf Region
- GMC provided equipment and support for the first Valvuloplasty and Angioplasty procedures in the Gulf Region.
- Established all the Electrophysiology Centers of Excellence in the Gulf Region
- Installed the first Robotic Surgical System in the Gulf Region.
- Installed the first Radio Surgery CyberKnife in the Middle East.
- Installed the first OR1 Karl Storz Medical System in the Gulf Region.
- The first Excimer Laser Coronary procedure in the Gulf Region.
